Ideal customer

Tech-savvy car buyers aged 24-44 (Millennials/Gen Z) seeking transparency and simplicity. First-time serious buyers, young professionals, and early-stage families. They want the car, not the process.

Acquisition

People discover Vehique through the web, car search SEO, and creator videos that show the agent doing the work. They first use it free to search every major car marketplace in one place. When they are actively buying, they upgrade for a full end to end workflow with agentic deep research, clear comparisons, managed shortlists, and our unique custom automation that calls dealers to confirm cars and pricing and schedules visits.

Scale

Vehique scales as more shoppers use the agent and stay with us across the whole buying journey. We earn from subscriptions and higher tier plans for active buyers, plus B2B deals with dealers and brokers who plug into our workflows. The more searches and deals we handle, the better our data, automations, and agentic research get, while the cost of running each new user stays low.
